## 2. Patient Home Page

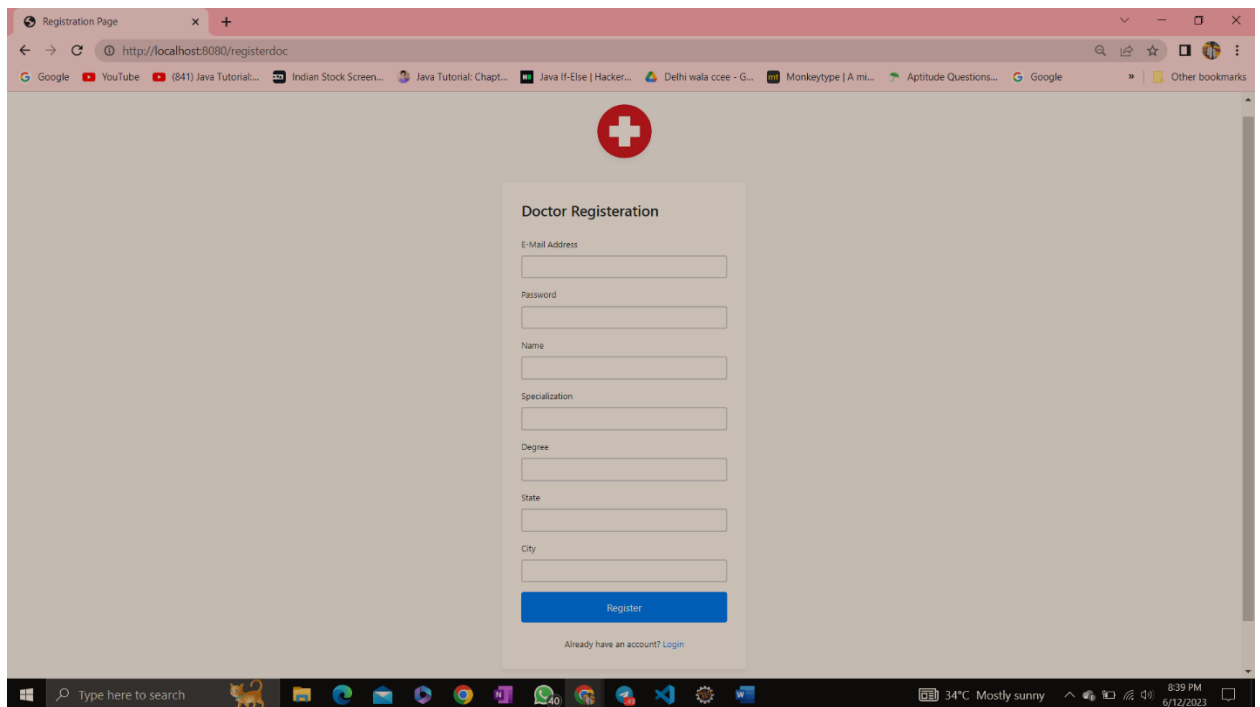

### 3. Doctor's Details for a patient

The screenshot shows a web browser window with the title "Doctor's Appointment". The address bar displays "http://localhost:8080/docdetails". The page features a navigation bar with a red cross icon, the text "Doctor's Appointment", and links for "Home", "Appointments", and "Logout". Below the navigation bar is a table with the following columns: "Doctor's EmailID", "Name", "Specialization", "Degree", "State", "City", and a date input field "mm/dd/yyyy" followed by a "Book Appointment" button. The table contains three rows of data:

Doctor's EmailID	Name	Specialization	Degree	State	City	mm/dd/yyyy	Book Appointment
roushan@gmail.com	Roushan	dentist	bms	maharashtra	Pune	<input type="text"/>	<input type="button" value="Book Appointment"/>
kumar@gmail.com	kumar	cardiology	MD	UttarPradesh	Varanasi	<input type="text"/>	<input type="button" value="Book Appointment"/>
arvind@gmail.com	arvind	dermatology	MS	MadhyaPradesh	Satna	<input type="text"/>	<input type="button" value="Book Appointment"/>

### 4. Doctor's Signup Form

The screenshot shows a web browser window with the title "Registration Page". The address bar displays "http://localhost:8080/registerdoc". The page features a red cross icon and a "Doctor Registration" form. The form contains the following fields: "E-Mail Address", "Password", "Name", "Specialization", "Degree", "State", and "City". Below the form is a blue "Register" button. At the bottom of the form, there is a link: "Already have an account? Login".

## 5. Patient's Details for a doctor

The image shows two screenshots of a web application titled "Doctor's Appointment".

The top screenshot displays the "userdetails" page. It features a table with the following columns: Doctor's Email, Doctor's Name, Specialization, Appointment Date, and Cancel Appointment?. The table contains four rows of data:

Doctor's Email	Doctor's Name	Specialization	Appointment Date	Cancel Appointment?
roushan@gmail.com	Roushan	dentist		<input type="button" value="Cancel"/>
roushan@gmail.com	Roushan	dentist	2023-06-13	<input type="button" value="Cancel"/>
kumar@gmail.com	kumar	cardiology	2023-06-15	<input type="button" value="Cancel"/>
arvind@gmail.com	arvind	dermatology	2023-06-20	<input type="button" value="Cancel"/>

The bottom screenshot displays the "patientlist" page. It features a table with the following columns: Patient's Email, Appointment Date, and Cancel Appointment?. The table contains two rows of data:

Patient's Email	Appointment Date	Cancel Appointment?
kumar.roushan@gmail.com		<input type="button" value="Cancel"/>
kumar.roushan@gmail.com	2023-06-13	<input type="button" value="Cancel"/>
